

Make a Tiny Seeing Lens

In *Queen Michelle and the Tiny Seeing Lens*, Michelle finds a little disc of glass. When she peers through it, she can see the good hearts glowing in everyone. Make a seeing lens of your own, and go looking for good hearts too!

- 1 Color the frame gold**, like the twist of gold wire around Michelle's lens.
- 2 Cut along the dashed lines**, around the outside and the handle, then the circle in the middle. Glue it onto card to make it strong.
- 3 Hold it up to your left eye**, just like Michelle!
- 4 Go heart spotting.** Look for someone being kind, helpful or brave, and write it down below.

Grown-ups: for a shiny lens, tape a piece of clear plastic wrap across the hole.

My good-heart spotter

Michelle looked past soggy fur and prickly quills and found a warm heart every time. Who did you see with a good heart this week?

Who?

The good heart I saw: what did they do?

Who?

The good heart I saw: what did they do?

Who?

The good heart I saw: what did they do?

Who?

The good heart I saw: what did they do?

Who?

The good heart I saw: what did they do?

Who?

The good heart I saw: what did they do?
